

FRED B AKANJI

IDENTITY AND ACCESS MANAGEMENT SOLUTIONS ARCHITECT

United States | Remote | 240-633-9427 | fredootaka@gmail.com

Professional Summary

Experienced IAM Engineer/Architect boasting more than 6 years of expertise in crafting, deploying, and overseeing identity management solutions. Deeply passionate about enhancing customer experiences. Proficient with platforms such as Okta, SailPoint, and Active Directory.

Skills

IAM Tools: SailPoint (IdentityNow, IdentityIQ), Okta, Ping (PingFederate, PingID), Oracle Identity Manager (OIM), Microsoft Entra ID, AWS IAM.

- Protocols: SAML, OIDC.
- Cloud Platforms: AWS, Azure, GCP.
- Security Tools: CASB, AWS GuardDuty, Azure Security Center, CloudTrail.
- Languages: JavaScript, NodeJS, ExpressJS, PowerShell.
- Agile Methodologies
- Leadership and Communication
- Team Facilitation
- Continuous Learning
- Change Management
- Technical Knowledge
- Agile Tools
- Software Development Life Cycle (SDLC)

Work History

IAM Solutions Architect
CenterWell Senior Primary Care

07/2024 - Current

- Spearheaded the deployment of Okta to enable Single Sign-On (SSO) and Multi-Factor Authentication (MFA) across 30+ critical applications using SAML and OIDC protocols, resulting in a 60% improvement in login efficiency and a 50% reduction in password-related support tickets.
- Executed comprehensive security assessments on access control mechanisms within diverse IT environments, leading to the successful integration with top-tier Enterprise IGA. Utilizing Azure AD, and Okta, enhancing security compliance by 80%.
- Developed a robust security framework tailored for hybrid cloud architectures across AWS and Azure, improving threat detection by 90% and incident response times by 50%.
- Led a team of 8 engineers in the creation and implementation of a scalable IAM solution with SailPoint, positively impacting over 20,000 users nationwide by increasing access control accuracy by 95%.
- Developed comprehensive migration guides, user job aids, and troubleshooting documentation for complex IAM implementations using Okta. These materials were specifically designed to ensure smooth transitions to new systems by providing clear, step-by-step instructions for both end-users and administrators.
- I collaborated with cross-functional teams to ensure documentations were accurate, user-friendly, and tailored to Okta's capabilities. This approach helped reduce issues and improve user adoption throughout the migration process, ensuring that the implementation was as seamless as possible for all users.
- Enforced NIST 800-63 and other access control frameworks across multiple IAM projects, ensuring compliance with industry standards for secure authentication and identity management. For example, I designed and integrated multi-factor authentication (MFA) solutions and identity proofing strategies to enhance security for both internal users and third-party partners.
- Implemented secure federation protocols, such as SAML and OpenID Connect, to streamline access for both internal users and third-party partners while maintaining strong security controls across enterprise systems. These measures not only enhanced operational efficiency but also improved the overall security posture and ensured compliance with regulatory standards like GDPR and SOC 2, resulting in a 15% reduction in security incidents.
- Offered strategic technical leadership and advisory services organization-wide, leading to a 30% increase in security posture maturity within one fiscal year and a 20% improvement in governance compliance.
- Successfully implemented SAML assertions across 35 applications, standardizing authentication practices and reducing login failures by over 75%.

- Overhauled identity lifecycle management with ForgeRock Identity Workflow, slashing user provisioning errors by 55% and increasing compliance with privacy regulations by 65%.
- Achieved a 55% decline in unauthorized access through the strategic enhancement of role-based access control (RBAC) framework, markedly improving security operations efficiency.
- Pioneered the adoption of Entra ID in conjunction with Okta for advanced identity verification, securing application access with a 99.9% success rate in authentication accuracy and a 60% reduction in fraud attempts.

Identity and Access Management Developer

Morgan Stanley

04/2020 - 06/2024

- Deployed Okta to facilitate Single Sign-On (SSO) and Multi-Factor Authentication (MFA) using SAML and OIDC protocols across several applications, enhancing access management.
- Undertook thorough evaluations of access control functionalities across various data security systems, data lakes, and applications, guaranteeing their successful integration with Enterprise IGA and IAM solutions like SailPoint, Azure AD, and Okta.
- Developed an extensive security framework for multi-cloud environments, covering both AWS and Azure platforms.
- Guided a team of 10 engineers in the development and launch of a worldwide IAM solution with SailPoint, benefiting over 30,000 users.
- Initiated the development of a technical strategy for CIAM operational enhancements, focusing on user registration, self-service capabilities, and admin operations.
- Provided consistent technical leadership and consulting across the organization, influencing key strategic decisions and aiding in architectural governance.
- Collaborated with development teams to design and create API integrations authenticated by ForgeRock and Okta using SAML, OAuth, and OpenID Connect.
- Developed and implemented SAML assertions for over 25 applications, ensuring a secure and uniform authentication method.
- Designed and rolled out identity lifecycle management workflows using ForgeRock Identity Workflow, cutting down user provisioning mistakes by 40% and improving compliance.
- Achieved a 40% reduction in unauthorized access incidents by refining the role-based access control (RBAC) framework.

- Implemented multi-factor authentication (MFA) with ForgeRock Adaptive Authentication, leading to a 70% decrease in unauthorized access attempts and bolstering the security infrastructure.

Education

Bachelor of Arts: Business Administration, 05/2017
University of Buea - Buea

Certifications

- AWS Certified Solution Architect - Professional
- Microsoft Certified : Azure Security Engineer Associate
- Okta Certified Professional
